Ig gamma-3 heavy chain disease proteins - human
C;Species: Homo sapiens (man)
C;Species: Homo sapiens (man)
C;Species: 31-Dec-1979 #sequence_revision 23-Oct-1981 #text_change 16-Jul-1999
C;Accession: A90442; A90219; A90198; A93915; A02149
R;Frangione, B.; Rosenwasser; E.; Prelli, F.; Franklin, E.C.
Biochemistry 19, 4304-4308, 1930
A;Title: Primary structure of human gamma3 immunoglobulin deletion mutant: gamma3 heavy-A;Reference number: A90442; MUID:81021548; PMID:6774747
A;Contents: heavy chain disease protein Wis
A;Accession: A90442
A;Molecule type: protein
A;Note: the molecule is a dimer linked by 12 disulfide bonds; it has an extra interchain A;Note: the molecule is a dimer linked by 12 disulfide bonds; it has an extra interchain A;Note: the sequence of residues 42-76 was taken from the reference that follows
R;Michaelsen, T.E.; Frangione, B.; Franklin, E.C.
J. Biol. Chem. 252, 883-889, 1977
A;Title: Primary structure of the 'hinge' region of human IgG3. Probable quadruplication A;Reference number: A92219; MUID:77118561; PMID:402363
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT
